1. Claims 2-4 and 7-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9. Applicant's traversal appears to be based upon rejoinder of species if an allowable base claim can be agreed upon. While this is not technically a traversal, Examiner does agree to rejoin the species if an allowable base claim is agreed upon.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On line 3 of claim 6 is the phrase "that the opens". It is not clear what opens.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1,5 and 6, as can be understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Nagashima et al. '370, who discloses the dual brake-throttle lever on lines 39-44 of column 4.

Art Unit: 3724

5. Claims 1,5 and 6, as can be understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Nickel '444, who discloses a throttle lever (114a) and a linked brake delay on lines 58-62 of column 5.

6. Made of record but not relied are numerous patents disclosing a relationship between the throttle and the brake.
